**Re: Lake Point Quarry, Utah County
Notice of Intention to Commence Large Mining Operations
Appendix A – Replacement Pages**

Dear Mr. Baker:

Ames Construction, Inc. is submitting two copies of the enclosed Appendix A pages to be added/replaced. At the time of the submittal early last week, some of the analytical data had not been processed. Ames received the data today. The results indicate that the representative soil samples taken were not acid generating; therefore, the overall soil characterization analysis determining 3" and 5" salvageable topsoil depths, remains the same. Simply replace pages 11-12 of the Ecological Baseline Report found in Appendix A and add the remaining pages (ACZ Laboratories, Inc. report) to the end of the Ecological Baseline Report, and prior to the custom NRCS soil report also found in Appendix A.

Please contact me with any questions or concerns with this submittal and thank you for your cooperation on this important matter.

Sincerely,

Christopher Ennes
Western Region Environmental Manager
